

OneSpace Designer Release 12 - Supported Platforms

With release 12 of CoCreate's OneSpace Designer product suite, CoCreate is taking the opportunity to focus on our customers' key platforms and operating systems and retiring a number of older operating systems that are no longer supported by their respective suppliers. This allows our development teams to concentrate all efforts on new and improved product capabilities to meet our customers' needs.

In light of Microsoft's announcement to discontinue Windows NT 4 and Windows ME, we are also synchronizing the list of operating systems supported across the product suite.

The following sections offer detailed information for each product in the OneSpace Designer product suite about the platforms supported by release 12. Also listed are the platforms supported by the currently available software versions.

Platforms supported by current R11.65 and new R12:

OneSpace Designer Modeling

OneSpace Designer Modeling	Operating System
R12	Windows 2000 Windows XP Professional HP-UX 11.00 ACE [PA-RISC 2.x] HP-UX 11.11 (11i) [PA-RISC 2.x]
R11.65	Windows NT 4.0 SP6a Windows 2000 Windows XP Professional HP-UX 11.00 ACE [PA-RISC 1.x, 2.x] HP-UX 11.11 (11i) [PA-RISC 1.x, 2.x]
