Title	Why Does The config.pro Option PRO_COLORMAP_PATH Not Work When Its Value Is Set To <Drive>:\<Path>\<Filename>?						
Product	Pro/ENGINEER	Module	GLOBAL FUNCTIONS	TPI ID	31742	Created	08-JAN-99
Workstation	All			Reported In Release	20.0	Reported In Datecode	
SPR	None			Resolved In Release	20.0	Resolved In Datecode	
Description ----- When configuring the config.pro option "PRO_COLORMAP_PATH" and setting its value to <drive>:\<path>\<filename>, the actual setting does not take effect. For example one has the PRO_COLORMAP_PATH in the config.pro file set to D:\users\color.map it does not take effect, even though the config.pro file is located in the working directory and in the <Pro/E LP>\<text> directory. Alternate Technique ----- See 'Resolution' below Resolution ----- When setting the config.pro option "PRO_COLORMAP_PATH" the actual filename should not be included in the value of the setting. So instead of D:\users\color.map it should be D:\users
