

Ribbon Hotfix

This hotfix repairs ribbon and CUI-related problems in AutoCAD® 2009-based products.

Description of Problem

This hotfix repairs the following ribbon- and CUI-related problems in AutoCAD 2009-based products:

- On a ribbon panel, you may not be able to move items between rows.
 - A ribbon panel continues to display after it is removed from a ribbon tab.
 - A ribbon tab and/or menu macro may not function properly when referenced from multiple CUI files.
 - Enterprise, main, and partial CUI files display multiple ribbon tabs in workspaces.
 - A button image used on a ribbon panel that is loaded from a resource DLL file lack a transparent background.
 - If you transfer a ribbon panel and a tab, buttons display small.
 - If you load a CUI file that references a missing BMP file, a fatal error displays.
-

Affected Products

- AutoCAD® 2009
 - AutoCAD Architecture 2009
 - AutoCAD Civil 3D® 2009
 - AutoCAD Electrical 2009
 - AutoCAD Land Desktop 2009
 - AutoCAD LT® 2009
 - AutoCAD Map 3D 2009
 - AutoCAD Mechanical 2009
 - AutoCAD MEP 2009
 - AutoCAD OEM 2009
 - AutoCAD P&ID 2009
 - AutoCAD Raster Design 2009
 - AutoCAD Revit® Architecture Suite 2009
 - AutoCAD Revit MEP Suite 2009
 - AutoCAD Revit Structure Suite 2009
-

Installation Instructions

To install the Ribbon Hotfix

NOTE: You must have administrative privileges on your Microsoft® Windows® operating system to complete the installation process.

1. Close all software applications.
2. Locate your product installation folder (for example: *C:\Program Files\AutoCAD 2009*).
3. In this folder, right-click the *AcCui.dll* file and click Properties.
4. Click the Version tab and confirm the file version.
 - o If the file is version **17.2.56.0**, then proceed with this installation.
 - o If the file is version **17.2.56.5** or higher, then this hotfix has already been applied.
5. In the product installation folder, right-click the following files and rename them:
 - o *AcCui.bak*
 - o *AcCustomize.bak*
 - o *acmgdinternal.bak*
 - o *AcRibbon.bak*
6. Based on the version of your product, double-click *CUI_Hotfix_32bit.zip* or *CUI_Hotfix_64bit.zip*.
7. Extract the following files to your product installation folder:
 - o *AcCui.dll*
 - o *AcCustomize.dll*
 - o *acmgdinternal.dll*
 - o *AcRibbon.dll*
8. Right-click the *AcCui.dll* file and select Properties. Click the version tab and confirm that this file is version **17.2.56.5**.

NOTE: To remove this hotfix, delete the new files that you downloaded to the product installation folder and restore the files you renamed in Step 5 to the original names.
