

The tool has made changes to your computer to address .NET Framework installation problems.

Please try reinstalling the .NET Framework or update that was failing. Keep this dialog box open so you can explore additional repair options if necessary.

If the reinstallation succeeded, choose Finish. If the reinstallation didn't fix the issue, choose Next to explore additional troubleshooting options.

Submit additional information

The tool is unable to resolve the installation issue on your computer.

The following [logs](#) will be sent to Microsoft for further analysis.
