OSNAP marker flickers or disappears before a selection can be made

Published date: 2005-Dec-13

ID: TS1054187

Applies to:

AutoCAD® Architecture 2008

Autodesk® Architectural Desktop 2007

Autodesk® Architectural Desktop 2006

Issue

You were not able to accurately select the OSNAP location because the OSNAP marker flickered or disappeared before you could make a selection.

Solution

This issue occurs when both the *ADT.CUI* and the *ACAD.CUI* are loaded in your current session. To resolve the issue you must unload the *ACAD.CUI*.

1. At the command prompt, enter **CULOAD**.
2. In the Load/Unload Customizations dialog box, under the Loaded Customization Groups: area, select ACAD.
3. Click the Unload button
4. Click Close

The OSNAP marker should now function correctly. If you need to use ACAD commands or menus, you can load them using the Customize User Interface dialog box.

Give us your feedback on this document:

- Resolved my issue.
- Helpful but incomplete.
- Difficult to find.
- Difficult to understand.
- Did not resolve my issue.
- Document contains broken links and references.
- No comment.
