

## **RELEASE NOTES**

### **COSMOSWorks 2004 SP2.0**

<b>SPR #</b>	<b>Problem Description</b>
186930	When running COSMOSWorks from the Task Scheduler, occasionally a run time error message appears. This bug has been fixed.
190976	Use the COSMOSWorks Task Scheduler to run a model with several studies. The Task Scheduler runs all the studies, but the report is generated for the first study only. This bug has been fixed.
192478	COSMOSWorks will not load if the SolidWorks language is in Czech. This bug has been fixed.
192750	In a french OS if the Tools ->Options-> Document properties->units is set to Custom, some material properties appear as zero. This happens only when only COSMOSMotion is checked as an Add-in. This bug has been fixed.
193381	Create a thermal study. On any face apply 0 deg. celsius. Apply heat on some other face. Run the FFE solver. On the face where 0 deg. celsius is applied we will see some non-zero temp. distribution for high quality mesh. This bug has been fixed.
194530	In the attached assembly, mesh the model using Tet 10 (high order) elements and then run the studies 'StudyFFEPlus'. The results are incorrect. This bug has been fixed.
