Excellent

Title	Unable to Suppress Individual Members in a Group by Using the Config.pro Option "del_gp_memb_ind" When Set to "yes".						
Product	Pro/ENGINEER	Module	FEATURE OPERATIONS	TAN ID	117627	Created	28-OCT-02
Workstation	All			Reported In Release	2001	Reported In Datecode	2001150
SPR	985357			Resolved In Release		Resolved In Datecode	
Description ----- Documentation for Pro/ENGINEER 2001 and later states that it is possible to suppress individual members in a group by using the config.pro option "del_gp_memb_ind" when set to "yes", but the config.pro option is not valid. Alternate Technique ----- Individual group features cannot be suppressed. The entire group must be suppressed or redefined to not include the specific feature. Resolution ----- Functionality to suppress individual group members was not implemented in Pro/ENGINEER Release 2001 nor Pro/ENGINEER Wildfire. The config.pro option "del_gp_memb_ind" is not a valid option and will not be recognized nor allowed to be entered into the Options dialog box from within Pro/ENGINEER. Documentation will be corrected for Pro/ENGINEER Wildfire Production datecodes.
