Description MEPrint 13.00

The macro MEPrint is designed to enable support for direct printing with ME10 while bypassing the Printer Manager Dialog for Windows.

Features/Fixes MEPrint 13.00

- Print to filename with Suffix of Plottype to current directory

- Support OSD Drafting Rev.13.00

Requirements

Win XP or Win 2000 and ME10 (OSD Drafting) Rev.13.00

The MEPrint is designed to work with every ME10 for Windows.

Installation

INPUT '<PATH>\MEPRINT.M'
Sm_plot

Once loaded and called you will get a 'CONFIG' button in the plot menu which when clicked transfers you to the 'PLOTTERCONFIG' menu.

If ME10 still brings the Printmanager Dialog, check the Option in the Plotmenu.

Support

This tool is completely UNSUPPORTED. However in the case of failures send a detailed error report to the following email address:
